AUTISM affects 1 out of every 31 children (Centers for Disease Control and Prevention 2025). Autism is a complex neurological disorder significantly affecting verbal and non-verbal communication, social interaction, motor skills and learning ability. Each individual exhibits a combination of these symptoms and it varies for each individual by different degrees.

Thank you in advance for your support! As a father with 3 boys on the autism spectrum, I am very grateful for your participation.

Sincerely,

Josh Heinz
